INTEGRA ALL IN ONE

3-axis thermostatic valve and lockshield integrated with t-piece set

Available versions:

Connections:

The set contains:

- 3-axis thermostatic valve with T-piece for heating element assembly
- 3-axis lockshield valve with T-piece for heating element assembly
- Thermostatic head M30x1.5

- Pipe-masking set
- 2 x adapter PEX, ALU-PEX 16x2
- 2 x adapter CU Ø 15

The valve should be installed in accordance with the specified direction of the heating medium flow and return. The design of the kit allows the heater to be installed on each of the valves, however, for safety reasons, we recommend placing it on the cut-off valve. **NOTE:** The kit does not allow the installation of TERMA REG 2 and REG 3 heaters.

CONFIGURATION CODE

Product codes can be found in product data sheet tables. The codes provide some basic information about the product while a partially filled configuration code contains complementary information about the detailed specifications. When placing an order, Product codes should include the fully completed configuration part. The configuration code part should be placed after the main Product code. The main product code and configuration part will appear as shown in the example below:

Code structure
